longer wearlife

Uni-Mix System for Cedarapids Pugmills

Replace worn pugmill mixer tips in less than 5 minutes!

KENCO Uni-Mix has achieved widespread popularity among operators of asphalt plants with square shaft pugmill mixing systems. Now the same benefits of the Uni-Mix System are available for Cedarapids pugmill plants. Just install the one-time conversion shaft and from then on, replace worn tips in less than 5 minutes.

Uni-Tips are fastened with a single roll pin, and can be removed with a hammer and punch.

Uni-Shrouds protect the conversion shaft from wear. Their wedge-shaped design slices through the mix with less drag, longer wearlife.

Uni-Mix conversion shafts can be easily installed with the KENCO supplied alignment tool.

Uni-Mix components are cast for longest wearlife from exclusive KENCO Alloy-K metals with a standard hardness in excess of 550 Brinell. For extreme applications, 700 Brinell is available.

Benefits:

- one-piece Uni-Tip greatly simplifies installation
- Uni-Tips can be changed in less than 5 minutes with just a hammer and punch
- Uni-Tips provide significantly longer wearlife
- wedge-shaped Uni-Shrouds slice through the mix with less drag, longer wearlife
- one-time conversion shaft is easily installed using KENCO supplied alignment tool
- conversion shaft is completely protected from wear by Uni-Shrouds
- special KENCO Alloy-K metal (550 Brinell) provides superior abrasion resistance
