

# Kenco Engineering, Inc.

longer wearlife for elevator buckets

available with Tungsten Carbide Wear Lips!

Kenco Engineering elevator buckets with Tungsten Carbide Impregnated (TCI) wear lips provide substantially longer wearlife than standard buckets. A feature unique to Kenco buckets is the TCI "clean-up" lip. These wear lips project 1/2 inch farther than normal to help prevent material from accumulating and hardening at the bottom of the elevator.

## Benefits:

- Exclusive Tungsten Carbide Impregnated wear lips provide substantially longer wearlife
- Optional Clean-Up Lips project an extra 1/2 inch to help eliminate material build-up
- Fabricated steel buckets are continuous welded both inside and outside
- Tungsten carbide impregnated wear lips can be installed or replaced in the field
- Custom manufactured to exact job requirements

*Still proudly made in the USA*
